DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on December 2, 2002 was considered by the Examiner.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11, 24-28, and 41-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bryan Patent Number 5,361,554 in view of Clear Patent Number 4,944,127.

Bryan '554 teaches all the limitations of the claims except panels with two layers. Bryan '554 teaches the use of deck blocks (12') to build a deck over substructure or joints (26"), panels (12') are abutting at the ends to form a deck surface, recesses for splines (18') secured to the joints (26") by fasteners (54) generally parallel to the top surface and perpendicular to the side surfaces of the joints. Clear '127 teaches a flooring panel with a top layer (14) that is inflexible and made of concrete, adhesively secured to a lower flexible layer (18) with a rib structure (column 3, lines 60-62), both layers have substantially the same size, and square in shape (see Figure 1). Clear '127 further teaches that the panels can be manufactured without the tongue and grooves.

It would have been obvious for one skilled in the art at the time the invention was made to substitute the all wood block for a two layer panel as taught by Clear '127 since it is held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Terminal Disclaimer

4. The terminal disclaimer filed on December 2, 2002 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of Application Number 09/608,816 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Arguments

5. Applicant's arguments with respect to claims 1-11, 24-28, and 41-43 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3637

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
